Project Design Phase
Proposed Solution Template

Date	29 September 2026
Team ID	SWTID-2026-7788
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Standard laptop requests are handled manually through emails, approvals and vendor follow-ups, causing delays, errors and no clear order visibility.
2.	Idea / Solution description	Automate laptop orders with ServiceNow Flow Designer: a catalog request triggers a flow that validates the standard model, routes approval, creates procurement tasks and notifies the requester.
3.	Novelty / Uniqueness	One low-code, end-to-end flow replaces manual hand-offs; approval rules and models are configurable without custom scripting.
4.	Social Impact / Customer Satisfaction	Employees get laptops faster with live order tracking, and IT staff spend less time on repetitive work.
5.	Business Model (Revenue Model)	Internal cost-saving model: saved IT effort, faster turnaround and fewer errors on the existing ServiceNow platform.
6.	Scalability of the Solution	Extendable to other hardware and software requests, more locations and vendors, and ERP or asset system integration.
