Project Design Phase
Streamlining IT Procurement:
Automating Standard Laptop Orders with Flow Designer

Date	29 September 2026
Team ID	SWTID-2026-7788
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between the slow, manual laptop ordering process and an automated ServiceNow Flow Designer solution. Its goals are to:

- Find the best tech solution to automate standard laptop orders and remove manual procurement effort.
- Describe the structure, characteristics, behavior, and other aspects of the Flow Designer solution to project stakeholders.
- Define features, development phases, and solution requirements for catalog ordering, approval, and fulfilment.
- Provide specifications according to which the solution is defined, managed, and delivered.

Example - Solution Architecture Diagram:
